5 New York hotels with ridiculously great views (that you can actually afford)

Our pick of the best budget hotels in NYC

1. Boro Hotel: Brand spanking new and based in Long Island City - the arty patch of Queens that's on the up, with its quick commute to the centre of town, hip bars and restaurants and loads of warehouse spaces - Boro Hotel offers something all those swanky midtown hotels can't, a jaw-dropping view of the city skyline from every bedroom. Inside it's all industrial cool; think plenty of glass and concrete, grey colour palette. Rooms are simply furnished with floor-to-ceiling windows, oak floor, and some have a terrace. There's a lobby bar and cafe with large communal table and fireplace, plus a roof terrace with panoramic NY views. It's a real find at £116 per night.
